

keltbray Rail

keltbray Rail

Keltbray Rail has been involved in the construction of a number of the UK's most prominent and successful infrastructure projects. We believe our direct delivery philosophy in Design, Project Management, On Site Delivery and Rail Plant provides real confidence in our ability to control all aspects of project delivery hence mitigating our clients' delivery risk.

From commencement to completion on all infrastructure projects, we focus on client drivers. Our practical experience and design-led philosophy are brought together to drive innovation, the safety of our people and infrastructure, time and quality benefits from the very earliest stages of the project.

As part of the wider Keltbray Group, Keltbray Rail is at the forefront of investing in the latest technologies and has the capacity to deliver best practice solutions in engineering, design and operational delivery.

Our approach is:

- **Working Closely** with our Clients to be clear on their project and business drivers and then ensuring we consistently deliver against them.
- **Promoting Innovation** – our early involvement and design-led philosophy drives real customer value and innovation, delivering time, cost and safety benefits.
- **Ensuring Safety** – our commitment to training and developing directly employed labour ensures our high standards of safety and quality performance are consistently delivered.
- **Maintaining Quality** – ensuring all projects are managed and delivered to time and to a high standard ensures trains run in a safe timely manner.

► Safety, Quality and the Environment

Our five year Safety, Quality and Environmental Strategy puts our customers and our people at the heart of our business.

Our ambition is that through the development of people who are committed to our company, and our client drivers, we will create a working environment where our own people are our on-site champions, looking after themselves, their

colleagues, the infrastructure and the environment.

By creating positive ownership and engagement of our people at all levels we can create a work environment where **everybody goes home safely every day** and our **clients enjoy a high quality of built infrastructure**.

Through Keltbray's strategy we are committed to direct delivery of

all phases of our business. Our belief is that if we are to achieve our ambition of driving real client value through certainty of delivery, we do this through our own people who understand and are committed to our ambition; are trained and developed so they have the skills to honour that ambition and grow as individuals; and they have the appropriate tools, support and engagement to ensure their and every project succeeds.

Engagement:

Ensuring our employees understand, and are brought into our ambition and values, that we aspire to.

Training and Development:

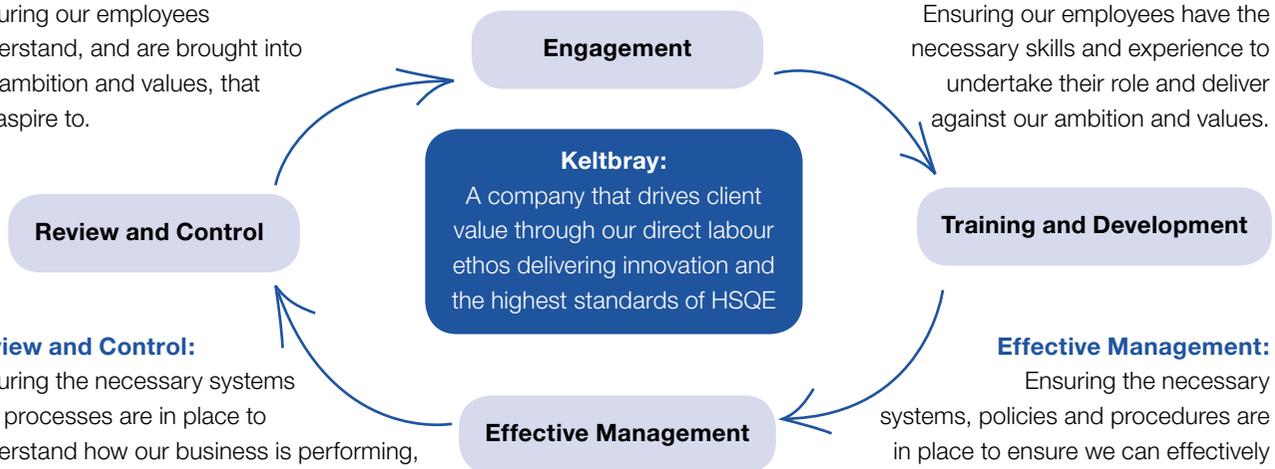

Ensuring our employees have the necessary skills and experience to undertake their role and deliver against our ambition and values.

Review and Control:

Ensuring the necessary systems and processes are in place to understand how our business is performing, to recognise success, learn our lessons and continually improve our business.

Effective Management:

Ensuring the necessary systems, policies and procedures are in place to ensure we can effectively direct, and manage and control our business and its operations.

► Engineering Led

It is a core belief of Keltbray that real client value in cost, quality, time surety and safety are, and should be, driven from the very front end of a project.

We believe our in-house design consultancy, working with our clients, partners and operational teams can drive and maximise client value against all project objectives.

Keltbray's in-house design companies offer comprehensive Civil Engineering, Geotechnical, Environmental and Rail Engineering expertise. **Wentworth House Rail Systems** is a leading provider of electrification design and consultancy services to rail companies and contractors across the UK.

Our team has extensive experience in all aspects of

railway, from permanent way, civil engineering and structures, to electrification, including D.C. and A.C. Overhead Line Electrification (OLE) and rail contact systems for heavy and light railways.

Based on our understanding of the relationship between railway electrification, signalling

and track, we ensure minimal visual intrusion and maximum rail operational flexibility.

Our Rail design business is part of a wider Keltbray design capability which specialises in structural, geotechnic and environmental engineering supporting rail projects when required.

Challenging Projects Require Innovative Solutions

► Delivery – Electrification

Keltbray Rail has one of the largest Design and Overhead Line Project Management and Construction Teams within the UK. Our people are highly trained, experienced and committed to ensuring the safety and quality of Network Rail's infrastructure.

Keltbray believes that through early engagement real client value can be driven from the front end of a

project through to completion.

As a company that prides itself in direct delivery, our commitment to training is at the heart of our business.

We believe our training and direct delivery model ensures the highest standards of safety and quality are honoured on all of our projects.

When operating in new areas, Keltbray is committed to securing and developing local labour, developing their skills through our locally established training centres. This strategy offers significant social and economic projects, including minimising travel times, project costs, providing a long term sustainable resource whilst reducing our carbon footprint.

► Delivery – Rail Engineering

Keltbray Rail has highly experienced multi-disciplined teams within the UK who are committed to ensuring the safety and quality of Network Rail's infrastructure.

Keltbray Rail's Rail Engineering division undertakes civils and permanent way projects fully supported by our own safety critical labour supply and plant.

The business has a proven track record of delivering on

the most complex projects for our clients whether we are designing, constructing, maintaining or renewing.

Our rail engineering experience has helped build a client list that includes some of the most important rail companies in the country.

In addition to Link-up approvals, Keltbray Rail operates under a Network Rail approved Principal

Contractor Licence allowing independent worksite management and control on rail networks. We maintain our On-Track Plant Operations Scheme Licence, allowing the Company to operate road rail vehicles and maintenance machines on the rail infrastructure.

Keltbray Rail's strength comes from its in-house company capabilities with qualified and highly experienced.

► Plant

Keltbray Rail owns 68 Road Rail Vehicles, including the largest fleet of rail electrification MEWP's in the country, to carry out electrification, permanent way and civil engineering projects.

Our dedicated maintenance and operational teams ensure that our plant is maintained to the highest standards and operated to fully comply with our On-Track Plant Operations Scheme Licence. This capability

gives us confidence that our people are working with the best maintained equipment available therefore ensuring their safety and ability to deliver.

As part of Keltbray's ongoing investment and commitment, a further significant investment in the first 5 of 10 new Rail MEWP's providing specialist 10m reach capability have recently arrived in the UK. This is the first major UK investment in new specialist overhead line fleet for many years.

Challenging Projects Require Innovative Solutions

► Training

Our philosophy for training all personnel is paramount for the safety and quality on the rail infrastructure, not only for internal personnel but external clientele. On major programmes we have experience of undertaking a leading role in training for cross-consortia purposes.

Keltbray Rail operates five training centres logistically placed in Ashford, Basildon, Bridgend, Crewe and

Rugby covering a range of training, including:

- Electrification Installation Training
- Technical OHL Training
- Occupational Skills
- Specialist Construction Skills
- Permanent Way and Plant
- Civil Engineering

Our Crewe Training Centre provides training for internal and external personnel in our industry leading overhead line training facility.

We have the facility to undertake training on bespoke and repetitive installations of OHL Electrification Systems.

Keltbray Rail's resource strategy is to develop local people for local projects. We passionately believe that through local employment we are creating local sustainability, engendering a positive relationship with the local community, whilst providing a commercially beneficial solution.

Keltbray is the UK's leading specialist engineering, construction, decommissioning and environmental services business. The company is privately owned and was established in 1976. Today it employs nearly 1,000 people across the Group, and is founded on a history of long term repeat custom, driving client value through our modus operandi to engage early in projects to unlock client value and de-risk projects within the sectors of:

1. Rail
2. Demolition & Civil Engineering
3. Environmental Materials Management

Through our significant experience on major programmes of work, Keltbray teams have considerable experience in taking a balanced and long term sustainable consideration of economic, environmental and social impacts of all projects.

Keltbray is committed to the future of rail with significant investment in design technology, new rail road vehicles, plant and the development of our training schools throughout the UK.
